Revatrol Contains 100mg of Trans-Resveratrol Plus Three Key Antioxidants! Including 100mg of Alpha Lipoic Acid!

Dear Friend,

My staff tells me it's time. You're running out of *Revatrol* and your supply needs to be replenished, so I'm including a refill authorization with this letter. It's more important than ever that you take your *Revatrol* daily.

Evidence of the validity of the "French Red Wine Paradox" has been pouring in over the past few years. One scientific medical study after another have taken us another step towards confirming the anecdotal stories that have been circulating over the past 30 years about the benefits of moderate red wine consumption.

The most famous anecdotal example was, of course, the CBS *60 Minutes* feature story on the "Red Wine Paradox" back in the late 1970s, which attempted to address why people in France can eat such a high fat diet, smoke and drink what they like, and still live so much longer and healthier.

Since the airing of the *60 Minutes* story and other anecdotal case studies over the years, moderate wine consumption has been recommended by many very reputable cardiologists and physicians around the world, as well as me, for decades.

So, when the opportunity to help develop *Revatrol* arose, I jumped at it. But... I insisted on three very fair, but iron clad, guarantees from the makers of *Revatrol*, Renaissance Health Publishing, LLC...

**"I believe *Revatrol* is the best anti-aging formulation available and it has my involvement and endorsement."
- Dr. William S. Gruss, M.D.**

First, I insisted that *Revatrol* HAD to contain the highest possible bio-flavonoids called oligomeric proanthocyanidins – or OPCs.

OPCs are VERY IMPORTANT because they fight free radicals that cause accelerated aging and are crucial for supporting healthy circulation and strengthening capillaries.

But you need a high concentration of OPCs in your body to get the full benefit.

So, the higher the percentage of OPCs you take, the more of the active ingredient you get, and the more powerful the free-radical neutralizers you get working in your body.

**Even Fortune Magazine
featured the Harvard Study
on its February 2007 Cover!**

Over Please...

The highest amounts of OPCs are found in red wine. They are also found in most berries, turmeric, apples and even dark chocolate... but they are the highest in red wine.

Most brands of red wine supplements that compete with *Revatrol* have 5% of OPCs at best. Some, I've found, have only a disgraceful TWO PERCENT, but...

“Revatrol has the most OPCs I’ve ever seen offered – an astonishing 95%!”

Second, *Revatrol*'s formulation had to include three anti-oxidants that I consider key to anti-aging and better health: Alpha Lipoic Acid, Acetyl L-Carnatine and Quercetin.

• **Alpha Lipoic Acid is one of nature’s most versatile antioxidants with two important jobs: First, it neutralizes free radicals, which helps protect your brain, eyesight, liver and overall energy level. Alpha lipoic acid is a key brain protector because it is BOTH water and fat soluble, so it can get to all places in the body, including your brain, where it can protect you from a free radical attack.**

Alpha lipoic acid also rejuvenates exhausted antioxidants like vitamins E and C, and coenzyme Q10. For example, alpha lipoic acid replenishes vitamin E as it is used up fighting free radicals oxidizing LDL “bad” cholesterol. Once replenished, the vitamin E can get back to doing its job to squash free radicals.

It’s like having a constant supply of reinforcement soldiers that are always ready and able to take over so there’s a fresh fighting force!

It has also been shown to improve blood flow to peripheral nerves and stimulate the regeneration of new nerve fibers.

• **Quercetin is another powerful antioxidant that occurs naturally in red wine, however, it’s found in the highest amounts in the skins of apples, tea, onions, nuts, berries, cauliflower and cabbage.**

Quercetin has many of the same properties as Resveratrol, and when they are combined together, quercetin makes Resveratrol work better in your body by increasing bio-availability!

That’s great because Resveratrol has a tough time on its own getting into the body. Quercetin, just like in a glass of wine, helps get it to work more efficiently. Furthermore, within the flavonoid family, quercetin is the most potent scavenger of the dangerous free radicals reactive oxygen species (ROS) and superoxide.

Many other red wine extract products leave out this important ingredient, making them much less compelling formulations than *Revatrol*. You won’t find resveratrol and quercetin together in most other formulas!

• **Acetyl L-Carnitine helps your heart and brain by transporting fats into the “engine” powerhouse of each cell – your mitochondria – where the fat is burned for energy. This natural energy keeps your body moving and your heart pumping strongly. Simply put... you can’t burn fat without it!**

See the value for yourself...

Only **Revatrol** gives you the **HIGHEST** potency and quality!

Brand Name	Red Wine Extract	OPC Level	Trans Resveratrol	Alpha Lipoic Acid	Acetyl L-Carnitine	Quercetin

Acetyl L-Carnitine also has potent antioxidant activity. Several gold standard studies show that it helps people with mild memory problems associated with aging.

For instance, a double-blind placebo study found after one year acetyl L-Carnitine significantly improved logical intelligence, long-term verbal memory and attention in the study's participants.

Another double blind placebo study showed that acetyl L-Carnitine can help support good concentration and attention.

ONE caplet a day gives you the equivalent of 50 bottles of Red Wine!

No more gulping down a bunch of pills like you have to with a lot of other natural supplements. With **Revatrol** you only need to take ONE caplet a day. Because it's a caplet — not a tablet — it's easier to swallow, too! So just take one per day and forget about it for the rest of the day. It feels great to know that when it comes to your health — you're COVERED!

One caplet of **Revatrol** gives you:
 Red Wine Extract100 mg
 Trans-Resveratrol100 mg
 Quercetin100 mg
 Acetyl L-Carnitine100 mg
 Alpha Lipoic Acid100 mg

Third, I wanted to be able to change **Revatrol** at any time if I believe the change would be an improvement.

And I have! Thanks to a lot of hard work and research, **Revatrol** now contains 100mg of Trans-Resveratrol, the equivalent of 50 bottles of red wine.

I like this amount of 100mg of Trans-Resveratrol in concert with the 95% OPC level, Alpha Lipoic Acid, Acetyl L-Carnitine and Quercetin. I believe, as a physician, that this dosage makes the most sense when relating the Harvard Medical School study results to humans.

Animal research suggests that Resveratrol increases mitochondrial biogenesis leading to increased exercise endurance and protection from diet induced weight gain.

The scientific evidence indicates that loss of weight was due to decreased fat, and this was attributed to an increase in the number and function of mitochondria and an increased metabolic rate. It actually switches on the genes that repair DNA and help you avoid the bad effects of a calorie-laden, high fat diet.

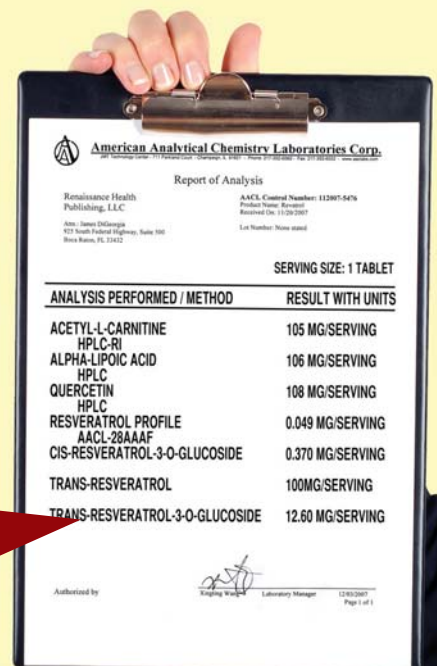

Think all Resveratrol is the Same? Well, THINK Again!

Fact! **Revatrol** delivers more trans-resveratrol and more resveratrol than many of the competing products combined. Even more than we claim!

Most brands give you only 20mg or so of red wine extract. Some even go as low as 5mg! That's not going to do much of anything to give you the results you're looking for. **Revatrol** has a 95% OPC and 100mg's of Trans-Resveratrol. **Revatrol** is formulated

with **Polygonum Cuspidatum Root Extract** and a **proprietary whole red wine grape complex including the skin, seed and leaf extract**. If it doesn't say this on the label...*don't buy it!* **Or better yet, call 1-866-482-6678 and order the real thing today: Revatrol.**

INDEPENDENT LAB RESULTS PROVE REVATROL GIVES EVEN MORE THAN CLAIMED!

Revatrol contains no alcohol, no sugar, no calories, and has no side effects. Just one caplet a day is designed to help you fight fatigue and feel more energized, protect your heart and arteries, and maintain cholesterol levels that are already within the normal range, while also keeping your skin looking firm, fresh and vibrant; benefits all associated with moderate red wine consumption and the anti-oxidant formulation in **Revatrol**.

We Can't Keep up With Demand!!!

We are a small, independent company, so the amount of **Revatrol** we are able to produce at one time is limited to ONLY enough for 15,000 people for 3 months. Keep in mind we have over 50,000 customers who have purchased **Revatrol** in the last 36 months. So, having enough for only 15,000 people is a BIG problem.

Our laboratory is working at full steam, and the next production of **Revatrol** will arrive in 6-8 weeks and even then, it will be just enough for the first 15,000 people to continue for another three months. So if you believe, as I do, that **Revatrol** is a must take supplement every day and you want to start taking this 100mg Trans-Resveratrol formulation including 100mg Alpha Lipoic Acid, you must order immediately.

For your benefit, we're giving you a chance to reserve up to a full year's supply of the 100mg Trans-Resveratrol formulation of **Revatrol**.

To make this very easy, I have included a REFILL AUTHORIZATION that will allow you to order up to a 1 year supply of 100mg Trans-Resveratrol formula of **Revatrol**, or set up an automatic refill shipment so you never run out.

Making it even easier and more cost effective, you can order this formulation of **Revatrol** and be guaranteed FREE SHIPPING & HANDLING with this special offer.

Time is of the essence, I believe we will be sold out of our latest production within days of mailing this letter.

To lock in delivery, please call TOLL FREE 866-482-6678 and order immediately before the supply is completely wiped out.

Sincerely,

Dr. William S. Gruss, M.D.

For Renaissance Health Publishing, LLC

Remember, studies suggest the anti-oxidants included in the *Revatrol* formula are very powerful:

- 20 times more powerful than Vitamin C
- 50 times more powerful than Vitamin E

If you want guaranteed value at the best price...

Why pay the same or more for red wine extract that has FEWER milligrams of resveratrol? **Revatrol** gives you 100mg of trans-resveratrol — and also includes 3 extra “boosters,” antioxidants, alpha lipoic acid, quercetin and acetyl l-carnitine, and the highest OPC rating of 95 percent!

All in all, you get the most for your money... and with the 100 percent money-back guarantee, you can be sure you never risk a penny for trying it.
